Subject: internship @ pixelbridge - frontend

hey!

good talking to you at the vasai tech meetup last saturday. as discussed am happy to offer you the frontend internship at pixelbridge studios. we are a small design+dev shop (4 people right now lol) working mostly with d2c brands.

stipend - 8k/month for first 3 months, will revisit after that based on how it goes. mostly react + tailwind work, you'll ship real client projects from week 1.

no formal offer letter as such but can send one on our letterhead if your college needs it for NOC. you can start from monday or whenever your exams get over, timings are flexible, office is near andheri station but remote is fine too.

btw check our work at pixelbridge.in and our insta @pixelbridge.studio

no payment or deposit or any such thing needed obviously, just bring your laptop :)

nikhil
